

Mobile Device Management the Smart Way

Imagine Campus Productivity with Apple and Cisco

As adoption of iOS devices in education grows rapidly, IT needs a simple way to support new learning and teaching methods, to enable large-scale deployments, and to ensure security and proper use.

Enter Cisco® Meraki® Systems Manager software. Schools and universities love its simplicity, rapid feature delivery, education-specific teacher's assistant features, and advanced security controls.

And Systems Manager is already integrated with Cisco networks, ensuring robust security and making it the best choice for mobile device management (MDM)—especially since Apple and Cisco are redefining business mobility with exclusive capabilities for iOS devices running on Cisco networks.

CIPA Compliant*

* Systems Manager helps with the broader compliance effort your organization may need to undertake.

Cisco Meraki Systems Manager Leads To:

Simplification

- Easy-to-use, intuitive cloud dashboard
- Automated device onboarding and configuration, including app restrictions and forced mandatory app installs
- Central configuration of out-of-the-box device settings for 1:1 and shared devices
- End-to-end network analytics and control
- Rapid push for apps or custom notices
- Effective allocation of resources for testing
- Remote troubleshooting
- Full integration with Apple Volume Purchase and Device Enrollment Programs

Better Education Experiences

- Assign iOS devices based on class schedules, topics, locations, or users.
- Enable instructors to automatically prepopulate iOS devices with learning materials.
- Allow teachers to lock devices so students only access a single, class-relevant app.
- Let teachers rapidly switch learning tasks with app control.
- Give teachers screen control (their own or the students') while blocking other iOS use in class.

Robust Security

- Restrict inappropriate or recreational content for students and maintain safe search compliance.*
- Control school-owned devices and accessed content with identity-based policies.
- Track iOS devices across campus for inventory management.
- Find lost or stolen devices with integrated location data.
- Remotely erase some or all content from missing or previously used devices.
