

Mobile Device Management Done Smart and Simple

Show a Healthy Business Record with Apple and Cisco

Mobile devices have certainly improved healthcare delivery. Yet IT needs an easy way to keep up with device configurations, app updates, and security protocols.

Enter Cisco® Meraki® Systems Manager software. It's ideal in healthcare due to its capabilities for simple and centralized provisioning, monitoring to locate and track devices, and security to support compliance requirements like HIPAA.

And Systems Manager is already integrated with Cisco networks, ensuring robust security and making it the best choice for mobile device management (MDM)—especially since Apple and Cisco are redefining business mobility with exclusive capabilities for iOS devices running on Cisco networks.

HIPAA Compliant*

* Systems Manager helps with the broader compliance effort your organization must undertake.

Cisco Meraki Systems Manager Leads To:

Simplification

- Easy-to-use, intuitive cloud dashboard
- Seamless user enrollment
- Automated policy deployments
- Rapid push of apps and custom alerts
- Remote troubleshooting

Robust Security

- Mandate “safe” device configuration.
- Encrypt patient data locally on iOS and OS X.
- Manage access to specific apps—to view electronic medical records, for example.

- Determine valid device use and compliance risks.
- Configure device settings to meet HIPAA requirements.
- Define distinct security and access policies for different users, such as doctors, nurses, and IT staff.
- Locate and track mobile devices and laptops for safeguarding and compliance.
- Remotely erase some or all content from previously used or missing devices.

Better Patient Experiences

- Enable secure access of patient health information on mobile devices for faster, informed decisions.
- Support caregiver mobility.
- Offer new patient engagement models, such as self-service kiosks.
- Improve critical medical device use through location data.
