

Mobile Device Management the Simple Way

Redefine What It Means to Delight Customers with Apple and Cisco

It's all about giving shoppers an awesome experience—and that means delivering on omnichannel strategies. Retail IT teams need an easy way to manage mobile device growth, enable these new capabilities, and ensure data security.

Enter Cisco® Meraki® Systems Manager software. It's perfect for retail due to its simplicity, rapid feature delivery, quick provisioning and management of distributed devices, and inherent security capabilities.

And Systems Manager is already integrated with Cisco networks, ensuring robust security and making it the best choice for mobile device management (MDM)—especially since Apple and Cisco are redefining business mobility with exclusive capabilities for iOS devices running on Cisco networks.

PCI Compliant*

* Systems Manager helps with the broader compliance effort your organization must undertake.

Cisco Meraki Systems Manager Leads To:

Simplification

- Easy-to-use, intuitive cloud dashboard
- Rapid push of iOS and app updates, custom messages
- Global device inventory and profile management
- Central remote device provisioning and app management
- Remote troubleshooting

Robust Security

- Lock iOS devices to electronic point of sale, kiosk, or catalog roles.
- Deliver alerts for critical events like connection loss to mobile electronic point of sale.
- Configure device settings to meet PCI compliance requirements.
- Determine valid device use and compliance risks.
- Find lost or stolen devices with integrated real-time location data.
- Remotely erase some or all content from previously used or missing devices.

Better Customer Experiences

- Enable secure mobile electronic point-of-sale (MePOS) transactions on iOS devices.*
- Ensure sales associates have current materials with content delivery and automatic updates.*
- Allow new experiences for shoppers with interactive catalogs and kiosks.
- Extend the online shopping experience into the store using store-managed devices.
- Reduce checkout lines, improve inventory management and queries, and increase overall staff efficiency.
