# FAST-TRACK LOGISTICS PRODUCTIVITY AND TRANSPORT EFFICIENCY

## AN EVOLVING LOGISTICS LANDSCAPE

The traditional patterns of supply and demand have been disrupted due to global factors, such as the pandemic, natural disasters, conflict, and, more recently, economic change.

While eCommerce flourishes, driving online demand, supplies of goods are impacted with skills in short supply. As a result, logistics is becoming more complex as deliveries shift from bulk for retail locations to single items for multiple areas.

# 54%

of logistics companies are expecting skills shortages to increase over the next five years.<sup>1</sup>

## TOP FIVE DEMANDS IN TRANSPORT AND LOGISTICS

- ▲ Attracting and retaining talent in the current labor shortage crisis
- ▲ Creating optimum user experiences to increase productivity and meet customer needs
- ▲ Improving cost savings and optimization, as well as streamlining operations
- ▲ Providing a seamless customer journey without delays or interruptions
- ▲ Preventing data breaches and cyber-attacks with technology solutions
