

Protect Critical Services and Prioritized Apps With HA/DR

[Read the Data Sheet](#)

How confident are you in your high availability (HA) and disaster recovery (DR) framework to fully protect your hybrid, distributed, cloud-driven, and edge-amplified infrastructure?

Any gaps in HA or DR can lead to data loss, downtime, and revenue disruption. But Denali can help you avoid that.

[Read the data sheet](#) to learn how to close your HA/DR gaps with business continuity aligned with your RPO and RTO requirements. Denali Advanced Integration partners with Dell Technologies for a best-in-class HA/DR solution so you can:

- Recover retail data quickly to keep operations running
- Mitigate infrastructure downtime or failure across sites
- Streamline business continuity with HA/DR framework services

BONUS: Learn how Denali deploys Dell EMC PowerEdge and Dell EMC PowerMax for highly available operations across your enterprise.
