

DENALI

Enabling the Modern Hybrid Workforce

Denali Delivers Key Requirements for a Successful Distributed Workforce

Today's employees demand the flexibility to work from anywhere. The threat of "The Great Resignation" and a highly competitive recruitment market are pushing organizations to make fundamental changes in their employment practices. Businesses of all sizes need to quickly gear up to support a more engaged and productive hybrid workforce.

As a Dell Technologies Titanium Partner, Denali Advanced Integration delivers solutions that allow organizations to meet the 4 critical requirements of today's hybrid workforce:

1. Reliable connectivity with corporate networks and systems

Denali provides a fully managed technology solution for connecting your distributed workers across the world, so they can enjoy fast, reliable, and secure access to your business.

2. Health, safety, and data security protections

Denali offers options like ergonomic office equipment and Covid test kits to help safeguard your employees' well-being and mental health, along with robust security solutions to ensure that data and IT assets are always secure and available.

3. Fully equipped to work from anywhere

Denali helps you orchestrate all the tools and technology your remote teams need for a productive workspace — easily ordered, expertly configured, and rapidly delivered to their door.

4. Dependable supply and logistics

Denali ensures that materials and equipment are scheduled to arrive according to prediction-based milestones, avoiding disruption by supply-chain variables or changing product lead times.
