

DENALI MANAGED SERVICES FOR APPLE: DEVICE MANAGEMENT

SIMPLE. PRODUCTIVE. SECURE.

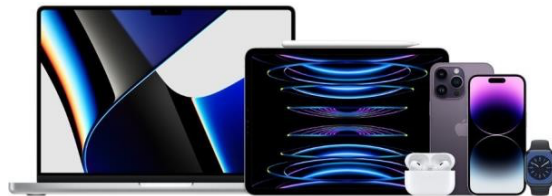

Apple® provides a myriad of options for your enterprise deployment. Denali Managed Services for Apple ensure your devices are managed simply and elegantly, ensuring your users maximize productivity and minimize downtime—securely.

Apple Business Manager enables automated enrollment for corporate-owned Apple products into Mobile Device Management (MDM). MDM provides robust management functions for company-owned and bring-your-own-device (BYOD) deployments. Benefits include:

- Multiple enrollment types (automated, device, or user)
- Identity management
- Management of corporate-owned or BYOD deployments
- Manage OS updates
- Ensure device security
- Distribute content
- Manage configuration

From shared iPads® to fully controlled iOS® devices, Apple deployment framework has you covered. Automate enrollment into MDM using Apple Business Manager for comprehensive control. The end user is provided the Apple technology they know and love, while you reap the benefits of a secure device with managed content.

Mac® as a standard and Mac as a choice is on the rise. Mac deployment can be as simple as shipping a device to a user, who finishes the setup and begins working. Configuration and management of the device happens remotely: we will work with your MDM of choice so your Apple products are managed securely and reliably.

Denali Advanced Integration delivers enterprise IT solutions and services, powered by strategic experts and best of breed technologies to help guide our clients through the most complex IT challenges. Denali leverages 30 years of IT expertise, along with purpose-built facilities, procedures, and technology platforms that optimize the productivity of customers as they deploy mobile devices. Our expertise in managed services paired with Apple's innovative technology provides an exceptional customer experience.
