# ARE YOU READY FOR APPLE IN YOUR ENTERPRISE?

## SIMPLE. PRODUCTIVE. SECURE.

Denali's Managed Services for Apple® help you analyze, assess and improve your technical and business landscape, ensuring you are ready to maximize the productivity of your employees using Apple devices. The Forrester Total Economic Impact of Mac® in Enterprise study has shown there is a 5% improvement in productivity per Mac user. Additionally, hidden costs are reduced, such as employee turnover and training. This improves productivity and highlights yet another benefit of Mac adoption.

Denali's Deployment Acceleration Service for Apple focuses on your goals when assessing connectivity, infrastructure, and platform within your environment. We'll ensure you are fully equipped to efficiently run Mac. Denali's dedicated Solution Architects take a comprehensive approach to understand your workflows and optimal outcomes and provide in a readiness assessment:

- WiFi validation
- Cellular connectivity assessments
- Security evaluations
- Device management recommendations
- Application and accessory suggestions

Denali's skilled Apple technical experts utilize the Mac Evaluation Utility (MEU) to assess your organization's ability to deploy Mac computers. The MEU shows clear indicators of success, warnings, and blockers that may prevent maximized use of the Mac in the environment, allowing us to identify any limitations and provide recommendations to resolve the issue based on Apple best practices.
