

AI-ready PCs, built for how your team actually works

HP and Denali help organizations adopt AI PCs with the performance, security, and manageability teams need — without adding complexity for IT.

70%

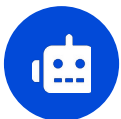

of workers say they want AI to lighten their workload — but most organizations don't know where to start.

WHAT MAKES A PC AI-READY

On-device AI processing

Built-in NPU delivers fast, on-device AI with no cloud latency or dependency.

Copilot in Windows 11 Pro

Automates repetitive tasks and surfaces real-time insights for faster decisions.

Layered security

HP Wolf Security and AMD PRO Security protect data across hardware and software.

Built for hybrid collaboration

AI noise reduction and adaptive lighting keep meetings sharp from anywhere.

HOW DENALI GETS YOU THERE

Evaluate

Assess device fit for your fleet, workflows, and security requirements.

Deploy

Secure configuration and rollout at scale, with minimal disruption.

Manage

Ongoing lifecycle support so devices keep pace with your business.

Ready to bring AI-ready PCs to your team?

Let's talk about your AI PC strategy — evaluation, deployment, and everything after.
